

SmartEHR™

You've come to the right place for a software-as-a-service EHR that:

- Supports solo, small and specialty health care practices
- Enforces prevailing HIPAA, HITECH Act, and FCC security and privacy requirements
- Structures patient encounters with templates that minimize errors and maximize quality
- Automates documentation and reporting tasks, avoiding unreimbursed work
- Updates professional practice and quality indicator guidelines, effortlessly keeping you current
- Enables participation in health information exchanges and accountable care organizations

The interoperable, cloud-computing SmartEHR™ lets you:

- Access comprehensive, multi-source, autopopulated patient records anytime, anywhere
- Enforce individual patient privacy preferences for data access and sharing with staff and colleagues
- Exchange continuity of care documents with other providers and EHRs per patient authorization
- Get patient-specific meaningful use and quality indicator alerts during and between encounters
- Coordinate and improve care plans with input from patients, their families and other providers
- Bond with patients by offering interoperable PHRs, self-care tools, secure e-mails and scheduling
- Outsource health IT support, upgrades and headaches, minimizing hardware and consultant costs

Subscribe only to the modules that you need:

- Each module supports a set of meaningful-use requirements
- You get web services that automate provider-provider and patient-provider information exchange
- Your subscription includes enough SmartPHR records for your all your patients
- Patients who have purchased retail SmartPHRs can find your practice and authorize you as a user
- On-demand ready-to-submit reports quantify your meaningful use and quality indicator achievements
- As federal and state meaningful use and quality indicator requirements change, you get no-cost updates

TO ORDER email: order@smarthealthrecords.com, or call 720-201-9705.

SmartEHR™	
For these Meaningful Use Criteria	Use these Modules
Access control	User Authorization
Accounting of disclosures	User Authorization; Information Exchange
Advance directives	Care Plan
Assign a unique name/number	User Authorization
Audit log	User Authorization
Authentication	User Authorization
Automate quality measure calculation	Care Plan
Automatic log-off	User Authorization
Body mass index	Care Plan; Observations
Calculate, submit quality measures	Disease Registry; Information Exchange; Reports
Clinical decision support	Care Plan
Clinical summaries	Care Plan; Reports
Computerized provider order entry	Order Entry Information Exchange
Drug formulary checks	Entry;
Drug-drug, drug-allergy interaction checks	Order Entry; Observations
Electronic copy health information	Care Plan
Electronic prescribing	Order Entry; Information Exchange; Observations
Emergency access	User Authorization; Information Exchange; Emergencies
Encryption when exchanging information	User Authorization; Information Exchange; Referrals
Exchange clinical information	Information Exchange; Reports; Referrals
General encryption	User Authorization
Generate patient lists	Disease Registry
Hospital discharge instructions	Care Plan; Reports; Observations
Incorporate lab results	Care Plan; Information Exchange
Integrity	User Authorization
Maintain active allergy list	Care Plan; Observations
Maintain active medication list	Care Plan; Observations
Maintain up-to-date problem list	Care Plan; Observations
Medication reconciliation	Order Entry
Patient reminders	Messaging; Scheduling; Observations
Patient specific education resources	Care Plan; Observations
Patient summary record	Care Plan; Reports
Plot and display growth charts	Care Plan; Observations
Print all or specific recorded information	User Authorization
Provide alerts with user-defined values	User Authorization; Information Exchange; Observations
Public health surveillance	Disease Registry; Information Exchange
Record demographics	Care Plan
Smoking status	Care Plan; Observations
Submit results to immunization registries	Care Plan; Disease Registry; Information Exchange; Reports
Submit results to public health agencies	Disease Registry; Information Exchange; Reports
Timely access	Care Plan
Vital signs	Care Plan; Observations
